***Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 30-39, drawn to an ophthalmologic instrument.

Group II, claim(s) 40-42, drawn to an alignment system.

Group III, claim(s) 43, drawn to a method for aligning an ophthalmologic instrument.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention in Group I has the special technical features of comprising a system for compensating for aberrations which comprises a refraction compensator that controls focusing and an astigmatism compensator; the invention in Group II has the special technical feature of comprising two identical channels positioned symmetrically with respect to the optical axis, when the instrument is properly aligned, the images of the marks combine on the iris to form a crossed circle and having a system for three-dimensional positioning of the instrument; and Group III has the special technical features of setting the proper distance between an ophthalmologic instrument and an eye, projecting images of marks onto the iris of

Art Unit: 2873

the eye, visually observing the mutual positions of the images and three-dimensionally positioning the instrument.

A telephone call was made to the offices of Douglas Holtz on April 23, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jordan M. Schwartz whose telephone number
